Re: Southwest General Contractors
Letter of Recommendation

As Director of Facilities and Project Manager I offer this letter of recommendation on behalf of Potter County. Southwest General Contractors Mr. Gary Purser and Mr. Wes Purser were contracted to perform the very unusual task of removing all non historic elements during the Selective Demolition Phase of our 1932 Historic Courthouse, in preparation of the buildings Historic Preservation Project. The guidelines, specifications and restrictions set forth by Potter County, the Texas Historical Commission and the Architect were very stringent for the task to be performed. The project time table was met as well as bringing the project within budget.

As project Manager for Potter County I hold all my contractors to the highest of expectations and never once had to question whether or not Southwest General Contractors was capable of performing the task at hand.

I would recommend the services of Southwest General Contractors after seeing them in action and how they presented themselves during all aspects of this project for which was in a true professional manner at all times; but there is only one true way that I can define how this company operates; they perform their work the old fashion way "With a lot of pride and for a purpose".

Respectfully
Mike Head
